MANN DAHIYA

UNITY DEVELOPER | GAMEPLAY PROGRAMMER | XR DEVELOPER

mannlakra10@gmail.com | LinkedIn | Portfolio | Phone: +91 6355399935

PROFESSIONAL SUMMARY

Unity/C# developer with 2+ years of experience building gameplay systems, multiplayer experiences, WebGL applications and VR/AR training simulations. Experienced in technical leadership, cross-platform optimization, REST API integration and persistent game systems.

TECHNICAL SKILLS

Core: Unity, C#, gameplay programming, OOP, UI systems, Git, performance profiling

Specialized: Mirror networking (RPCs, Commands, SyncVars), JSON persistence, REST APIs, WebGL, VR/XR, AR face tracking, lightmapping, light/reflection probes

Additional: C/C++ fundamentals, Python, Java.

PROFESSIONAL EXPERIENCE

Unity Engineer | Twin Reality Technologies — Apr 2025 – Present

- Developed and supported Unity enterprise games and training experiences used at event booths for major brands, with stable operation across repeated use over more than a year.
- Built Mirror-based LAN multiplayer with automatic discovery and host selection; integrated REST APIs, JSON-based user data capture, synchronization and persistent records.
- Adapted a basketball game for WebGL, reducing packaged build size from ~200 MB (PC) to ~10 MB (WebGL) by replacing heavy animation and optimizing textures and assets.

Lead Game Developer | Jabsz Gaming — Jan 2025 – Apr 2025

- Led 5 developers and 2 designers; coordinated tasks, technical direction and code conventions for Celestial Syndicate, a lunar survival-tycoon game.
- Developed gameplay architecture, progression, resource/building systems, rarity-based spawning, JSON saves and device-aware performance optimization.

SELECTED PROJECTS

LAN Multiplayer Budget Challenge: Mirror networking; LAN discovery, host election, synchronized configuration and leaderboards.

Celestial Syndicate: Survival-tycoon systems, technical leadership, building progression, resource spawning and persistence.

POSH Workplace Training Simulation: Four interactive scenarios; multi-mode dialogue and choice feedback, SALSA lip sync, saved progression and baked-lighting troubleshooting.

Face AR Filter Camera: WebAR Foundation face tracking, swipeable team filters, screenshot capture, local saving and API image submission.

VR Fire Safety Training: VR interactions for extinguisher usage, valves and guided industrial safety exercises.

EDUCATION & LEADERSHIP

B.E., Information Technology | Charutar Vidya Mandal University | 2020–2024 | CGPA 8.49

Community: Game-development speaker (100+ students, 2025); game-jam judge (2025, 2026).
